Comments: The SVT262-29/SVT262-28/SVT262-28A and the TA39A/TA38B/TA38C have applications too numerous to list here. See Application Guide pp 12-18. These adaptor sets are quite similar, but the SVT262-29/SVT262-28/SVT262-28A is a deeper neck than the TA39A/TA38B/TA38C. See drawings above, right.

Note: SVT262-28A & TA38C are shaped to resemble caps from system to be tested.

APPLICATION:

Most passenger vehicles through the mid 1980's have this radiator neck and many still do today. This is the configuration onto which the pump attaches directly.

For Necks 1" deep use 1/4" thick SVT262-22 spacer washer to compensate.
